Is This Communism? I object that my rights are being infringed upon. It is my right to be able to listen to Satellite Radio, at my expense. The quality of the programming cannot compare to most of the garbage on other forms of media.

I want the privilege to choose and I don't want the National Assoc. of Broadcasters to dictate to me.

I respectfully urge the FCC to reject the NAB' petition 04-160 and to support XM's ability to provide the king of programming that I demand and deserve.
